## Water Softener

*If you live in the San Antonio, Texas area and are looking for a water softener, please look over these flyers. Thank you for looking at this link. We are at your service!*

Enviro Solutions offers you a quality, reliable solution to your residential water softening needs. In San Antonio, we suggest a 1 ft<sup>3</sup> water softener for households with 1- 3 persons, and a 2 ft<sup>3</sup> water softener if there are 4 or more people in your household, or your household tends to use more water than the average household, or you may just like the idea of having extra soft water capacity for when company arrives as well.

All of our water softeners provide you with a softening system that you can be proud of. You can select from three different options for your water softener, no matter which option you select, your water softening needs will be fulfilled. The options are: **Good, Better, and Best.**

*All options work well with an optional reverse osmosis system available at a discounted price.*

## *¡What our Customer's have to Say!*

*“When my family and I decided to purchase a water softening system for our home, we called Enviro Solutions. Their staff was knowledgeable, professional, and fast! We recommend them to anyone who wants a job well done!”*

### **Reverse Osmosis System Option.**

For the ease and convenience of a higher quality water right at your fingertips, you can also consider an optional under the counter reverse osmosis system for your kitchen sink.

The reverse osmosis unit offers an additional level of water purity for cooking and drinking water, and it is mounted under your kitchen sink where it purifies your drinking and cooking water by sending water through a sediment and a carbon filter, before passing through the final filter of a reverse osmosis membrane to give you soft, enjoyable drinking and cooking water free of contaminants and hardness.

You can taste the difference!

ENVIRO SOLUTIONS

*Available as an added option for \$350.00 USD!!!*

### **With Softer Water**

- Your water heater and appliances will last longer.
- Your clothing will look better and last longer.
- Washing your hair will be quicker and easier.
- You can say goodbye to hard water stains.
